Datasheet MAO-6HC

## MAO-6HC

We fight unhealthy air, even on compact machines. Making compromises in the capacity of a BMAir system like the MAO-3CG? That's not an option! Our engineers have developed the BMAir MAO-6HC rooftop unit to maintain excellence. The streamlined design makes the BMAir MAO-6HC extremely suitable for mounting on the cabin roof. In fact, the system can be deployed in the most severe contaminations.

## PAC Smart Control

Monitoring safety within the cabin is equally crucial. Merely hearing a system running doesn't assure functionality. That's why the MAO-6HC includes a BMAir PAC control as standard.

- Easy to install high-quality sensitivity air quality sensor
- IoT ready, prepared for the real-time future
- Easy operation
- Maximum security through integrated data logging
- Easy to read colour screen with automatic day, night mode
- Maintenance messages with QR code generator
- Wide data possibilities through digital Rx / Tx connection

## Combi filters

The BMAir filters ensure that machine drivers work more safely than ever, even in polluted work environments. Especially in polluted environments. Because our advanced and patented technology make our systems and filters exceptionally effective. Even under the harshest conditions.
